means for providing a viewing area for assisting a user in positioning the apparatus over a particular area of the substrate; and

means for capturing coded embedded data from the surface of the substrate said embedded data including an orientation of the substrate and a location of the coded embedded data on the substrate.

*Pub.  
C2  
B2*

17. (Twice Amended) A method for capturing information from a substrate using an apparatus having a viewing area for assisting a user in positioning the apparatus over a particular area of the substrate, comprising:

positioning the apparatus over a particular area of the substrate using the viewing area; and

capturing coded embedded data from the surface of the substrate, said embedded data including an orientation of the substrate and a location of the coded embedded data on the substrate.

**REMARKS**

This is in reply to the Examiner's final Official Action dated May 8, 2002. Claims 1-32 are currently pending in the present application. Reconsideration of this application in light of these remarks, and allowance of this application are respectfully requested.
